SCIENTIFIC PROGRAM

II EUNE Gastric Cancer International Workshop

Towards standardization

General Information

Venue EUROSTARS MADRID TOWER HOTEL 5*
Paseo de la Castellana 259 B • 28046 Madrid, Spain
Phone +34 913 342 700 • Fax +34 913 342 7 01
www.eurostarsmadridtower.com

Official Language English

Registration (16% VAT not included) in www.eune2010.com

Fees	Up to 15 th February	From 15 th February
Delegate	€ 310	€ 350

Delegate Registration Fee includes documentation, coffee breaks and lunches on March 25th and 26th & certificate of attendance.

Hotel Accommodation (Beakfast and 7% VAT included) in www.eune2010.com

Workshop participant's special rates	Single Room	Double Room
Hotel Eurostars Madrid Tower 5* (Venue)	€ 171,20	€ 187,25
Hotel Tryp Centro Norte 3*	€ 102,72	€ 112,35

Under the auspices of

CME Accreditation

ACOE accreditation acknowledges the quality of the scientific programme and its educational value. ACOE is a multidisciplinary body of full time specialists practicing in the field of oncology and all recognised for their experience in education and expertise in their field.

25th - 26th March 2010, Madrid, Spain

www.eune2010.com

Organizer

Workshop Chairman

Santiago González-Moreno, MD, PhD (Madrid, Spain)

EUNE Coordinators

William H. Allum, MD (UK)
Hans-Joachim Meyer, MD (GE)

Past Workshop Chairman

Alfredo Garofalo, MD (IT)

Spanish Scientific Committee

Alvaro Díaz de Liaño, MD (Pamplona)
Luis González-Bayón, MD, PhD (Madrid)
F. Javier Lacueva-Gómez, MD, PhD (Elche)
Gloria Ortega-Pérez, MD (Fuenlabrada)
Manuel Pera-Román, MD, PhD (Barcelona)
Joaquín Rodríguez-Santiago, MD, PhD (Terrassa)
Josep Roig-García, MD (Girona)
Peter Vorwald, MD, PhD (Madrid)

Thursday, March 25th

- 09:00 WELCOME
- 09:10 OPENING REMARKS
History of EUNE on gastric and EG junctional cancer
Towards consensus
- 09:30 WORKSHOP THEME INTRODUCTION
Variations in the management of gastric cancer across Europe. Is there an "European approach" to gastric and E-G junction cancer?
- 09:45 STANDARDIZATION (I). AIM FOR A CONSISTENT APPROACH ACROSS EUROPE
Preoperative staging:
 - Endoscopy, including EUS and SMR
 - Imaging, including CT, PET-CT and MRI
 - Laparoscopy and peritoneal lavage cytologySurgery. What should be the standard for each stage?
Adjuvant therapy, neoadjuvant therapy or both? Standard of care
The need for a multidisciplinary team approach: Treatment selection
Discussion
- 11:15 Coffee break
- 11:45 Pathology assessment: TNM 7th edition and histopathology reporting
Does the Siewert Classification still have a place?
Best approach to E-G junction cancers
An outcome-based comparison of TNM 6th edition, TNM 7th edition and the Japanese Classification for gastric cancer
The new Japanese Classification of gastric cancer: Towards harmonization of Eastern and Western Classifications
Discussion
- 13:20 Lunch break
- 14:30 STANDARDIZATION (II). AIM FOR A CONSISTENT APPROACH ACROSS EUROPE
Experiences in the standardization of surgical technique through education
Translational Research in gastric cancer. What has been achieved, how can clinicians help, what is the role of collaborative laboratory work, how can collaborative work develop
Patient reported outcome measures. Quality of life
Data recording. Outcomes audit
Discussion
- 16:00 Tea break
- 16:30 TOWARDS CONSENSUS
- 18:00 End of day scientific sessions

Friday, March 26th

- 09:00 EARLY GASTRIC AND E-G JUNCTIONAL CANCER
Can we increase the numbers of early cancers?
Endoscopic diagnosis. Adjuncts to conventional endoscopy
Endoscopic therapy (mucosal, submucosal resections). Indications, technology and learning curve
Adequate surgery for early gastric cancer
Discussion
- 10:30 Coffee break
- 11:00 MULTIDISCIPLINARY APPROACH TO LOCALLY-ADVANCED GASTRIC CANCER: LOOKING FOR A EUROPEAN STANDARD
Neoadjuvant and adjuvant therapy (including trials)
 - Choice of cytotoxic agents. Have we reached the limit of conventional cytotoxic agents? Does the tumour site at the E-G junction make any difference to the selection of combination therapy?
 - Radiation therapy: Neoadjuvant, intraoperative, adjuvant, alone or combined?Discussion
- 12:00 Assessment of tumor response: its influence in therapeutic decision making
 - Imaging and PET-CT
 - Biological markers
 - Histopathological assessment of responseAdequate surgery for locally-advanced gastric cancer (including indications for laparoscopic resections) Should we be resecting clinical complete responders?
Optimal integration of care for locally-advanced gastric cancer
Discussion
- 13:30 Lunch break
- 14:30 ADVANCED DISEASE (INCLUDING TRIALS)
Prevention of peritoneal dissemination
Treatment of peritoneal dissemination
Role of surgery in stage IV gastric cancer
Role of chemotherapy and molecular target agents
Role of immunotherapy in peritoneal carcinomatosis
Role of radiation therapy
Discussion
- 17:00 WORKSHOP CONCLUSIONS
- 17:30 End of Workshop
