PARACELSUS
MEDIZINISCHE PRIVATUNIVERSITÄT

Dear Colleagues,

we invite you to improve your skills in endoscopic analysis and therapeutic decision making on early neoplasias of the gastrointestinal tract:

- Accurate endoscopic assessment of surface and microvascular structure (white light, NBI & BLI)
- Indications for endoscopic versus combined endoscopic-laparoscopic versus surgical resection techniques
- Techniques for mucosal resection, submucosal dissection and endoscopic or combined endoscopic-laparoscopic full-thickness resection

This meeting focuses on technical aspects to optimize endoscopic analysis and staging of neoplasias as well as strategies and performance of minimally invasive resections.

We hope to stimulate your interest and welcome you to the 9th Update on Endoscopic Skills in Salzburg.
