- Live Surgery
- EBM Lectures
- Training on models (fistula in ano, hemorrhoids, rectal prolaps, STARR etc.)

hot topic
fistula in ano

28th February – 1st March 2011

Wuerzburg, Germany

in cooperation with:

University Hospital Wuerzburg
Evidenzbasierte Medizin

Innovation

TRANSFORMING PATIENT CARE THROUGH INNOVATION™
Dear colleagues and participants,

After the great success of the first course in 2010 we are very pleased to invite you for the second Wuerzburg Coloproctology Course for education and hands on training at the University Hospital in Wuerzburg, Germany. Due to increasing specialisation and newly developed surgical techniques colorectal surgery becomes more and more sophisticated. All the more education and training is required to maintain and enhance quality of colorectal surgery. So far there is no surgical training course for coloproctologists available.

The aim of the second Wuerzburg Coloproctology Course is to offer education and training on the one part for traditional colorectal surgery and on the other part for newly developed techniques focussing on the transperineal and transanal approach. We like to instruct and train participants with basic and specialized surgical skill by means of live surgery - performed by highly experienced international specialists -, evidenced based colorectal lectures and specifically developed training models. The course is directed to either young coloproctologists under education as well as for advanced surgeons who want to exchange experience.

In addition to the content of the course we like to deepen knowledge about the subject “fistula in ano” in a specially established hot topic session.

Realization of the course is in conjunction with the Interdisciplinary Training and Simulation Centre (INTUS) at the university hospital in Wuerzburg.

We are looking forward to welcome you at the second Wuerzburg Coloproctology Course in Wuerzburg.

C. Isbert
Vice Chairman

C.-T. Germer
Chairman
Organizing Committee:
