Dear colleagues,

diagnosis and treatment of esophageal cancer represents a challenge for all medical care providers as the prognosis of patients with advanced tumor stages is still poor. Therefore, the present meeting will first focus on early stages of disease: how to diagnose the cancer and how to treat lesions by endoscopic interventions. The second part will analyze the multimodality treatment of advanced stages of esophageal cancer, looking at the optimal therapeutic sequence, effectiveness of its components and predictive markers for response. Controversial issues of this oncologic field will be highlighted and illustrated by interesting case presentations.

World known experts from many countries will present their experience and discuss with you different aspects related to esophageal cancer. New treatment frontiers will be defined, new diagnostic and therapeutic trends presented, individual treatment strategies formulated.

We are proud to host you in our Hospital Barmherzige Brüder, teaching hospital of the University of Regensburg and the largest Catholic hospital in Germany. The city of Regensburg, UNESCO heritage located on the river Danube, will enchant you with its beautifull scenaries and mediteranean flair.

Looking forward to meeting you in Regensburg

Sincerely yours,

Krankenhaus Barmherzige Brüder

11th and 12th July 2014
Large Auditorium, House St. Vinzenz, Third Floor

Program

Early esophageal cancer - Diagnosis
Chair: K. Ragunath, R. Bisschops
9.00 - 9.30
Improved endoscopic diagnosis of early Barrett’s neoplasia with advanced imaging techniques
R. Bisschops, Leuven, Belgium
9.30 - 10.00
Do we need EUS for staging of early esophageal cancer?
K. Ragunath, Nottingham, UK
10.00 - 10.30
New diagnostic tools – Future perspectives?
H. Neumann, Erlangen
10.30 - 11.00
Coffee Break
11.00 - 11.30
CT, MRI, PET-CT,… - What is necessary for accurate staging of early and advanced esophageal cancer
N. Zorger, Regensburg
11.30 - 12.00
Interesting Cases (with video)
12.00 - 13.00
Lunch

Early esophageal cancer - Treatment
Chair: S.R. DeMeester, J. Bergman
13.00 - 13.30
ER of early esophageal cancer
O. Pech, Regensburg
13.30 - 14.00
Endoscopic treatment on the edge: Is submucosal invasion always an indication for surgery?
H. Manner, Wiesbaden
14.00 - 14.30
The role of radiofrequency ablation in early cancer treatment – a technique that has revolutionized endoscopic therapy
J. Bergman, Amsterdam, Netherlands
14.30 - 14.50
Pathology for Dummies: What surgeons and endoscopists need to know
M. Vieth, Bayreuth
14.50 - 15.30
Coffee Break
15.30 - 16.00
CT, MRI, PET-CT,… - What is necessary for accurate staging of early and advanced esophageal cancer
N. Zorger, Regensburg
16.00 - 17.00
Interesting Cases (with video)
19.00
Bavarian Evening,
Haus Heuport, Dompfalt 7, 93047 Regensburg
Fee of 50 EUR to be paid at the registration desk
Saturday, 12.7.2014, 9.00 – 13.30
Advanced Esophageal Cancer
Multimodal Treatment
Chair: N. Mooßmann, M. Allgäuer
9.00 - 9.30
Neoadjuvant, adjuvant and perioperative Chemotherapy
F. Lordick, Leipzig
9.30 - 10.00
The role of radiotherapy in esophageal cancer – neoadjuvant, curative and palliative setting
P. Macchiarini, Stockholm, Sweden
10.00 - 10.30
Limited esophageal resection and minimal invasive esophagectomy
S. R. DeMeester, Los Angeles, USA
10.30 - 11.00
Extreme surgery for esophageal cancer
P. Macchiarini, Stockholm, Sweden
11.00 - 11.30
A dilemma of gastroesophageal cancers: esophagectomy vs. gastrectomy
O. Pech, Regensburg
11.30 - 12.00
Coffee Break
Palliative Treatment
Chair: W. Herr, A. Teufel
12.30 - 13.00
Adenocarcinoma of the esophago-gastric junction and squamous cell cancer: Palliative Chemotherapy
R. Porschen, Bremen
13.00 - 13.30
Palliative endoscopic treatment – The role of stents, laser and APC
O. Pech, Regensburg
